ABOUT

I am Jeeva Bharathi , a 2nd-year Computer Science Engineering student with a growing foundation in web development and practical exposure to AI tools. I am eager to apply my skills in real-world projects, collaborate with industry professionals, and continuously enhance my technical expertise. My goal is to bridge academic learning with industry practice and grow into a versatile developer capable of delivering innovative solutions.

CAREER OBJECTIVE

As a Computer Science (Cyber Security) student, I aim to secure a software development internship where I can contribute my growing skills in web technologies and security practices. I am committed to delivering efficient solutions while gaining valuable industry exposure that will strengthen my ability to innovate and adapt in professional environments.

SKILLS

- HTML, CSS - Well-versed with strong practical knowledge
- SQL - Solid understanding of database concepts
- JavaScript, Python - Basic knowledge, currently expanding skills
- Tools & Platforms: Git, GitHub, VS Code, Cursor, Antigravity, Supabase, Firebase
- AI Tools: Practical exposure to AI-driven development and productivity solutions
- Soft Skills: Communication, Teamwork, Problem-Solving

EDUCATION

B.E. Computer Science Engineering (Cyber Security)
Peri Institute of Technology, Chennai | 2024 - 2028
CGPA: 7.8

CERTIFICATIONS

1.- Certificate in HTML - LinkedIn Learning
2.- Full Stack Development - at nxtwave Completed modules in HTML, CSS, SQL, Python Basics
3.- JavaScript Fundamentals - GUVI

PROJECTS

ShelfSync is a smart, role-based online bookstore platform where customers browse books, sellers manage inventory, and admins control the marketplace.
It is built using HTML, CSS, JavaScript, and Python, with Supabase providing secure authentication and a cloud-based PostgreSQL database.

ACTIVITIES

- Engaged in a hackathon (2025), gaining valuable exposure to industry practices, enhancing technical expertise, and developing problem-solving abilities through collaborative teamwork.
